More than Hype - EAB!

The Emerald Ash Borer has spread to 11 states and adjacent parts of Canada. Far, more than **50 MILLION** unprotected Ash trees have died from this exotic pest, which threatens to kill most of the 7.5 billion Ash trees throughout North America! If you have not had your ash trees treated for EAB make sure you do so THIS spring. Otherwise your unprotected ash tree will die.

There are a number of companies out there who can assist you with preventive or curative services. If you would like a referral feel free to contact a member of the Cambridge HOA board or Kirkpatrick Mgmt.
